

The Pulmonary Function Technologist is a valuable member of the Respiratory Diagnostics team within the Division of Respiratory Medicine. The Pulmonary Function Technologist performs a variety of pulmonary diagnostic procedures in the ambulatory setting.

Here's what you'll get to do

- Perform routine and special pulmonary diagnostic procedures
- Obtain the best effort and cooperation from the patient for reliable test results
- Select the best data for reporting according to published standard criteria
- Maintain the work area in a safe and tidy condition
- Maintain and update the scheduled calibration on all equipment used in the laboratory
- Assist the Lead Technologist to maintain and/or order lab supplies and prepare monthly workload statistics
- Provide education in pulmonary technology to Fellows, Residents, and Medical Students
- Assist and participate in respiratory research

Here's what you'll need

- B.Sc. in a Biological Science or equivalent
- Registration or eligible for registration with the Canadian Association of Cardiovascular and Pulmonary Technologists (C.A.C.P.T.)
- Current BCLS certification
- Minimum one year experience with all aspects of pulmonary function testing
- In depth knowledge of respiratory anatomy and physiology
- Experience in Pediatrics is an asset
- Ability to work with minimal supervision in a team environment
- Attention to detail and efficient time management

- Excellent problem solving, communication, interpersonal and organizational skills
- Basic proficiency in computers
- A commitment to understanding and aiding in the pursuit of equity, diversity & inclusion

Here's what you'll love
